Backend & APIs	Node.js, GraphQL, Hasura, REST APIs, PostgreSQL
AI & NLP	Conversational Interfaces, LLM Integration
Testing	Jest, React Testing Library, Unit & Integration Testing
Integrations & Tools	GitHub API, Google Calendar API, Git, Linux

Professional Experience

Karya **Sep 2024 – Present**
Senior Product Engineer *Bengaluru, India*

- Architected a **fine-grained authorization system** with RBAC and ReBAC, built from scratch across **100+ API routes**, enforcing access policies for 4 personas (Project Manager, Project Coordinator, Tech Support, Finance Manager).
- Shipped a **self-serve role-management UI** that lets admins assign, update, and revoke roles in real time—**cutting access-provisioning time from hours to seconds** and eliminating manual database privilege changes.
- Onboarded **Google and OpenAI as clients** and **Anthropic and Microsoft as partners** onto Karya's PaaS platform, leading technical discovery, scoping integration architectures, and managing production deployments.
- Designed and shipped a **Natural Language Query (NLQ)** interface so non-technical stakeholders can query live PostgreSQL databases in plain English, **removing SQL dependency for end users**.
- Built **25+ modular task components** for collecting data across voice, touch, and selection formats, letting the platform support a wider range of client data-collection requests, including for workers in low-bandwidth, low-literacy environments.

Umrain **2024 – Present**
Founder *Bengaluru, India*

- Founded a **travel-tech startup** helping travelers plan and book Umrah independently, without traditional agents, and drove ~**$40K in first-year revenue** as a bootstrapped, solo-built venture.
- Built a **self-serve platform** that generates fully customized, end-to-end (home-to-home) Umrah itineraries tailored to each traveler's preferences, budget, and schedule.
- Owned **product, technology, operations, vendor partnerships, and customer support** end to end, including supplier and ground logistics, pricing, and compliance.

ZopSmart **Jan 2022 – Aug 2024**
Software Engineer *Bengaluru, India*

- **Kroger (US Grocery e-Commerce):** Core contributor to the homepage and navigation architecture of the **2nd-largest US grocery e-commerce SaaS**; redesigned category-discovery flows that increased click-through rate by **3**× and drove a **12% lift in product sales**.
- **EazyUpdates (Task-Management SaaS):** Engineered a leave-management and payroll-tracking module for HR teams; integrated **GitHub and Google Calendar APIs** for real-time employee-progress visibility, owning **50% of the total product build**.
- **Smrize (Productivity SaaS):** Built a mobile-first book-summarization platform with native audio playback; optimized mobile rendering performance to achieve a **20% traffic increase** and **24-minute average daily sessions** per user.

MountBlue Technologies **Aug 2021 – Jan 2022**
Software Engineer *Bengaluru, India*

- Shipped a production-grade **e-property listing marketplace** enabling landlords to list properties and tenants to browse and enquire; delivered a fully responsive, accessible UI with comprehensive unit and integration test coverage.

Education

REVA University **Jun 2017 – Jul 2021**
B.Tech, Computer Science *Bengaluru, India*
